REGIS & SAVOY CAPITAL • Design direction · 6 July 2026

What *unique* actually takes.

You asked for a site that does not read like a typical website. Fair. Today: the real ceiling of what is possible on two tiers, where your two new concepts sit, and what the timeline and budget buy.

---

1 THE FEEDBACK, HEARD

You were right about the four concepts.

Same layout, same type, different colors. That is a palette exercise, not four directions. The reset:

Reads as a typical website structure.

FIX: INTERACTION LED LAYOUTS, NOT SECTIONS IN A ROW

Feels static and generic.

FIX: MOTION BUILT IN, REAL PHOTOGRAPHY, NO STOCK FEEL

Not Lexus level.

FIX: RESTRAINT PLUS CRAFT, TWO CONCEPTS FORWARD FROM DESIGN 4

2 A SMALL PROOF, LIVE

The text you are reading is changing color as you scroll. This is the exact scroll effect. It is not custom code. It runs right here, and it will run on your homepage.

Scroll driven color and text transitions work on Wix Studio through scroll scrub animations and custom CSS. Both new concepts will use them.

3 TIER ONE · OUR PLATFORM

Built on Wix Studio. Judged by *Awwwards.*

Every site below runs on the platform we are using, and each earned recognition from the same jury that awards the most advanced custom sites in the world. The platform is not the bottleneck.

Save for Later

clicktokeep.com

The freshest proof of the ceiling. Confident, odd, nothing template about it.

HONORABLE MENTION · MAY 2026

Danik Bartolini

danikbartolini.com

Bold type and motion carrying a one person brand.

HONORABLE MENTION · MAR 2026

Share

shareintensive.com

Editorial structure that abandons the usual page rhythm.

HONORABLE MENTION · MAR 2026

Ciro Guatieri

ciroguatieri.com

Brand and digital folio with real art direction.

HONORABLE MENTION · JAN 2026

Visuvate Studio

visuvate.com

Clean, premium, interactive. Closest in tone to where we are going.

HONORABLE MENTION · DEC 2025

Body of Water

bodyofwateranthology.com

Storytelling paced entirely by scroll.

HONORABLE MENTION · NOV 2025

Leia Vallante

leiavallante.com

Immersive branding portfolio, atmospheric throughout.

WIX STUDIO SHOWCASE

Maskatorium

maskatorium.com

An interactive anthology. Playful and completely bespoke.

HONORABLE MENTION · SEP 2025

Happily Never After

dateitorhateit.com

Personality driven interaction on every screen.

HONORABLE MENTION · SEP 2025

Order and Chaos

digitalpandorasbox.com

Experimental layout pushed as far as no code goes.

NO CODE HONORS · 2025

4 TIER TWO · NO LIMITS

The other tier: *custom code,* shown honestly.

The most awarded sites on the internet. Full 3D, WebGL, physics, custom engines. Worth seeing so the line between the tiers is clear.

Igloo Inc

igloo.inc

A full 3D world driven by scroll.

SITE OF THE YEAR 2024

Lusion

lusion.co

Real time 3D studio playground.

SITE OF THE YEAR 2023

Lando Norris

landonorris.com

F1 driver brand site by OFF+BRAND.

SITE OF THE YEAR 2025

Exo Ape

exoape.com

Cinematic transitions, world class motion design.

MULTI AWARDED STUDIO

Bruno Simon

bruno-simon.com

The famous portfolio you drive a car through.

LEGENDARY PORTFOLIO

Active Theory

activetheory.net

The agency behind major immersive brand experiences.

MULTI AWARDED STUDIO

Unseen Studio

unseen.co

Cinematic WebGL and typography.

MULTI AWARDED STUDIO

Obys Agency

obys.agency

A typography and art direction masterclass.

MULTI AWARDED STUDIO

Locomotive

locomotive.ca

The agency that made smooth scroll a genre.

MULTI AWARDED STUDIO

Basement Studio

basement.studio

Brutalist 3D and heavy interaction.

MULTI AWARDED STUDIO

Sites on this tier are built by teams of 3 to 10 specialists over 3 to 8 months, at budgets that start near USD 50,000 and pass USD 250,000. That is ₹40 lakh and up, plus a developer retainer to keep them alive.

Custom code buys the top five percent of effects. Everything below that line we get on Wix Studio in weeks.

5 CAPABILITY COMPARISON

Wix Studio vs *custom code.*

CAPABILITY	WIX STUDIO · US	CUSTOM CODE
Bespoke, non template layouts	● Yes	● Yes
Scroll triggered animation, parallax, pinned sections	● Yes, native plus custom CSS	● Yes
Text color change on scroll	● Yes	● Yes
Cinematic video, hover states, micro interactions	● Yes	● Yes
Full 3D worlds, WebGL, physics	No	● Yes
Timeline	● 3 to 4 weeks	3 to 8 months
Cost	● ₹50,000, your scope	₹40 lakh to ₹2 crore and beyond
You edit content yourself later	● Yes	Developer required
Hosting, security, uptime	● Included	Separate cost plus retainer

6 THE COMMITMENT

What the next three weeks *buy.*

In scope, delivered

- Two new homepage concepts, both built forward from Design 4. Structurally different layouts, not color swaps.
- Real interaction: scroll driven color and text transitions, pinned narrative sections, entrance motion, considered hover states.
- Real imagery with a curated photography direction. No generic stock feel.
- On approval: the design system rolled across all five pages, responsive, performance optimized, QA tested.

Not in this scope

- 3D WebGL worlds and custom physics engines.
- Bespoke rendering pipelines like Igloo or Lusion.
- That class of work means a different platform and a timeline measured in months, not weeks. Happy to scope it separately if ever wanted.

Drawing this line now is what protects the late July delivery date.

7 WHAT I NEED FROM YOU

The main ask: a confirmed *design direction.*

That decision unblocks everything else. And we are building from less than it may seem: **there is no existing branding to start from,** and foundations take time to create.

---

i **Design direction, confirmed today**

Interaction led, Design 4 forward, Designs 1 to 3 fully retired. **Every day this stays open is a day not spent designing.**

---

ii **Branding: we are starting from zero**

There is no brand identity to design from. Building that foundation is real work and it takes time.

---

iii **Logo and other assets, still missing**

No logo or brand assets received yet. These set the design tokens for both concepts.

---

iv **Photography, still unclear**

Real team and office photography, or I art direct a licensed set. **Imagery was half the original feedback.**

---

8 THE NEXT TWO WEEKS

What I will deliver in the next *two weeks.*

WEEK ONE

Two interactive homepage concepts, both built forward from Design 4, with the scroll driven interaction system working, not mocked.

WEEK TWO

The chosen concept refined into the final homepage: imagery pass, motion polish, fully responsive across desktop, tablet, and mobile.
